**RE: BID 6068 - PURCHASE OF A LARGE FORMAT ELECTROSTATIC PLOTTER**

Dear Council Members:

The large format electrostatic plotter is a high capacity device capable of producing high quality color and black and white hard copy map prints for the City's Geographic Information System (GIS). This solid state plotting device will replace an existing pen plotter. The pen plotter has reached the end of its useful life (5 years) and it is time to replace it with a new device. The City believes, based on its mapping requirements over the next 5 years, that a high capacity, large format electrostatic plotter provides the most efficient and cost effective solution for hard copy map output. This device will be a shared resource for all City departments currently hooked into the Geographic Information System and will be used to support a wide range of engineering, environmental, planning and infrastructure management applications. If you have any questions or need additional information please call me at 427-1301.

Sincerely,

*Greg Meszaros*
